The screenshot shows the npm package page for 'react-motion'. At the top, it says 'Need Paper Moche' and has links for 'Products', 'Pricing', and 'Documentation'. The search bar contains 'Search packages'. The package name 'react-motion' is highlighted, with version '0.5.2', 'Public', and 'Published 5 years ago'. Below this, there are tabs for 'Readme', 'Explore', 'Dependencies', 'Dependents', and 'Versions'. The 'Readme' tab is active, showing the package name 'React-Motion' and a code snippet for using the library. The code snippet is:

```
import {Motion, spring} from 'react-motion';  
// In your render...  
<Motion defaultStyle={{x: 0}} style={{x: spring(10)}}>  
  {value => <div>{value.x}</div>}  
</Motion>
```

 Below the code, it says 'Animate a counter from 0 to 10. For more advanced usage, see below.' The 'Install' section shows the command 'npm install --save react-motion'. The 'Repository' section shows the GitHub link 'github.com/chenglou/react-motion'. The 'Homepage' section shows the GitHub link 'github.com/chenglou/react-motion#rea...'. The 'Weekly Downloads' section shows a graph and the number '673,699'. The 'Version' section shows '0.5.2' and the 'License' section shows 'MIT'. The 'Issues' section shows '146' and the 'Pull Requests' section shows '42'.

React-Motion

build passing npm package 0.5.2 bower package 0.5.2 discord react-motion/react-mo...

```
import {Motion, spring} from 'react-motion';  
// In your render...  
<Motion defaultStyle={{x: 0}} style={{x: spring(10)}}>  
  {value => <div>{value.x}</div>}  
</Motion>
```

Animate a counter from 0 to 10. For more advanced usage, see below.

Install

- Npm: `npm install --save react-motion`
- Bower: do not install with `bower install react-motion`, it won't work. Use `bower install --save https://unpkg.com/react-motion/bower.zip`. Or in `bower.json`:

Install

```
> npm i react-motion
```
